MEMORANDUM

SUBJECT: Evoqua RCRA TSDF Permit EPA ID No. AZD 982 441 263 - Update to prior EPA Endangered Species Act determinations

FROM: John Beach
Environmental Scientist

TO: Mike Zabaneh
EPA Permit Writer

On February 25, 2009, EPA determined that Federal action comprised by the subject permit will not affect threatened or endangered species or designated critical habitat. Such a determination must be made using a species list that is not more than 180 days old. Accordingly, I today obtained a list of threatened and endangered species and designated critical habitat for the area of the subject project. I have reviewed that list and the basis for the earlier determination that the subject permit will not affect threatened or endangered species or designated critical habitat and determine that the species and conditions have not changed and, accordingly, the subject permit will not affect threatened or endangered species or designated critical habitat.

With this determination, EPA completes its obligation under Section 7 of the Endangered Species Act and does not need to consult with the US Fish and Wildlife Service in order to issue the permit.
